Hiring Manager

[Company Name]

Re: Application for the Position of [Position]

Dear Hiring Manager,

I am writing to formally apply for the position of **[Position]** at **[Company Name]**, as advertised on JobStreet. I believe my professional background and technical qualifications align closely with the requirements of this role.

I am currently employed as a Backend Developer at PT Datacell Infomedia (Paydia), a Bank Indonesia-licensed Payment Service Provider (PJP Category 1) specialising in electronic money, fund transfer, and QRIS services. Over more than five years in software development, I have gained substantial experience in large-scale system migration without service disruption, the implementation of security and fraud-prevention controls, and the development of information systems for government institutions and universities.

My core technical competencies include PHP, Go, Node.js, MySQL, and Redis, together with practical experience in microservices architecture and system reliability engineering. I am confident that this combination of experience and technical skill would allow me to make a meaningful contribution to **[Company Name]**. For your consideration, I have enclosed my Curriculum Vitae, which details my educational background, professional experience, and relevant project portfolio.

I would greatly appreciate the opportunity to be considered for the next stage of your recruitment process. Thank you for your time and attention to my application.

Yours sincerely,

Zul Anggara
